Ellisdale Penn

2/8/17

Professor E A Luke
Washington D.C.

Dear Sir:

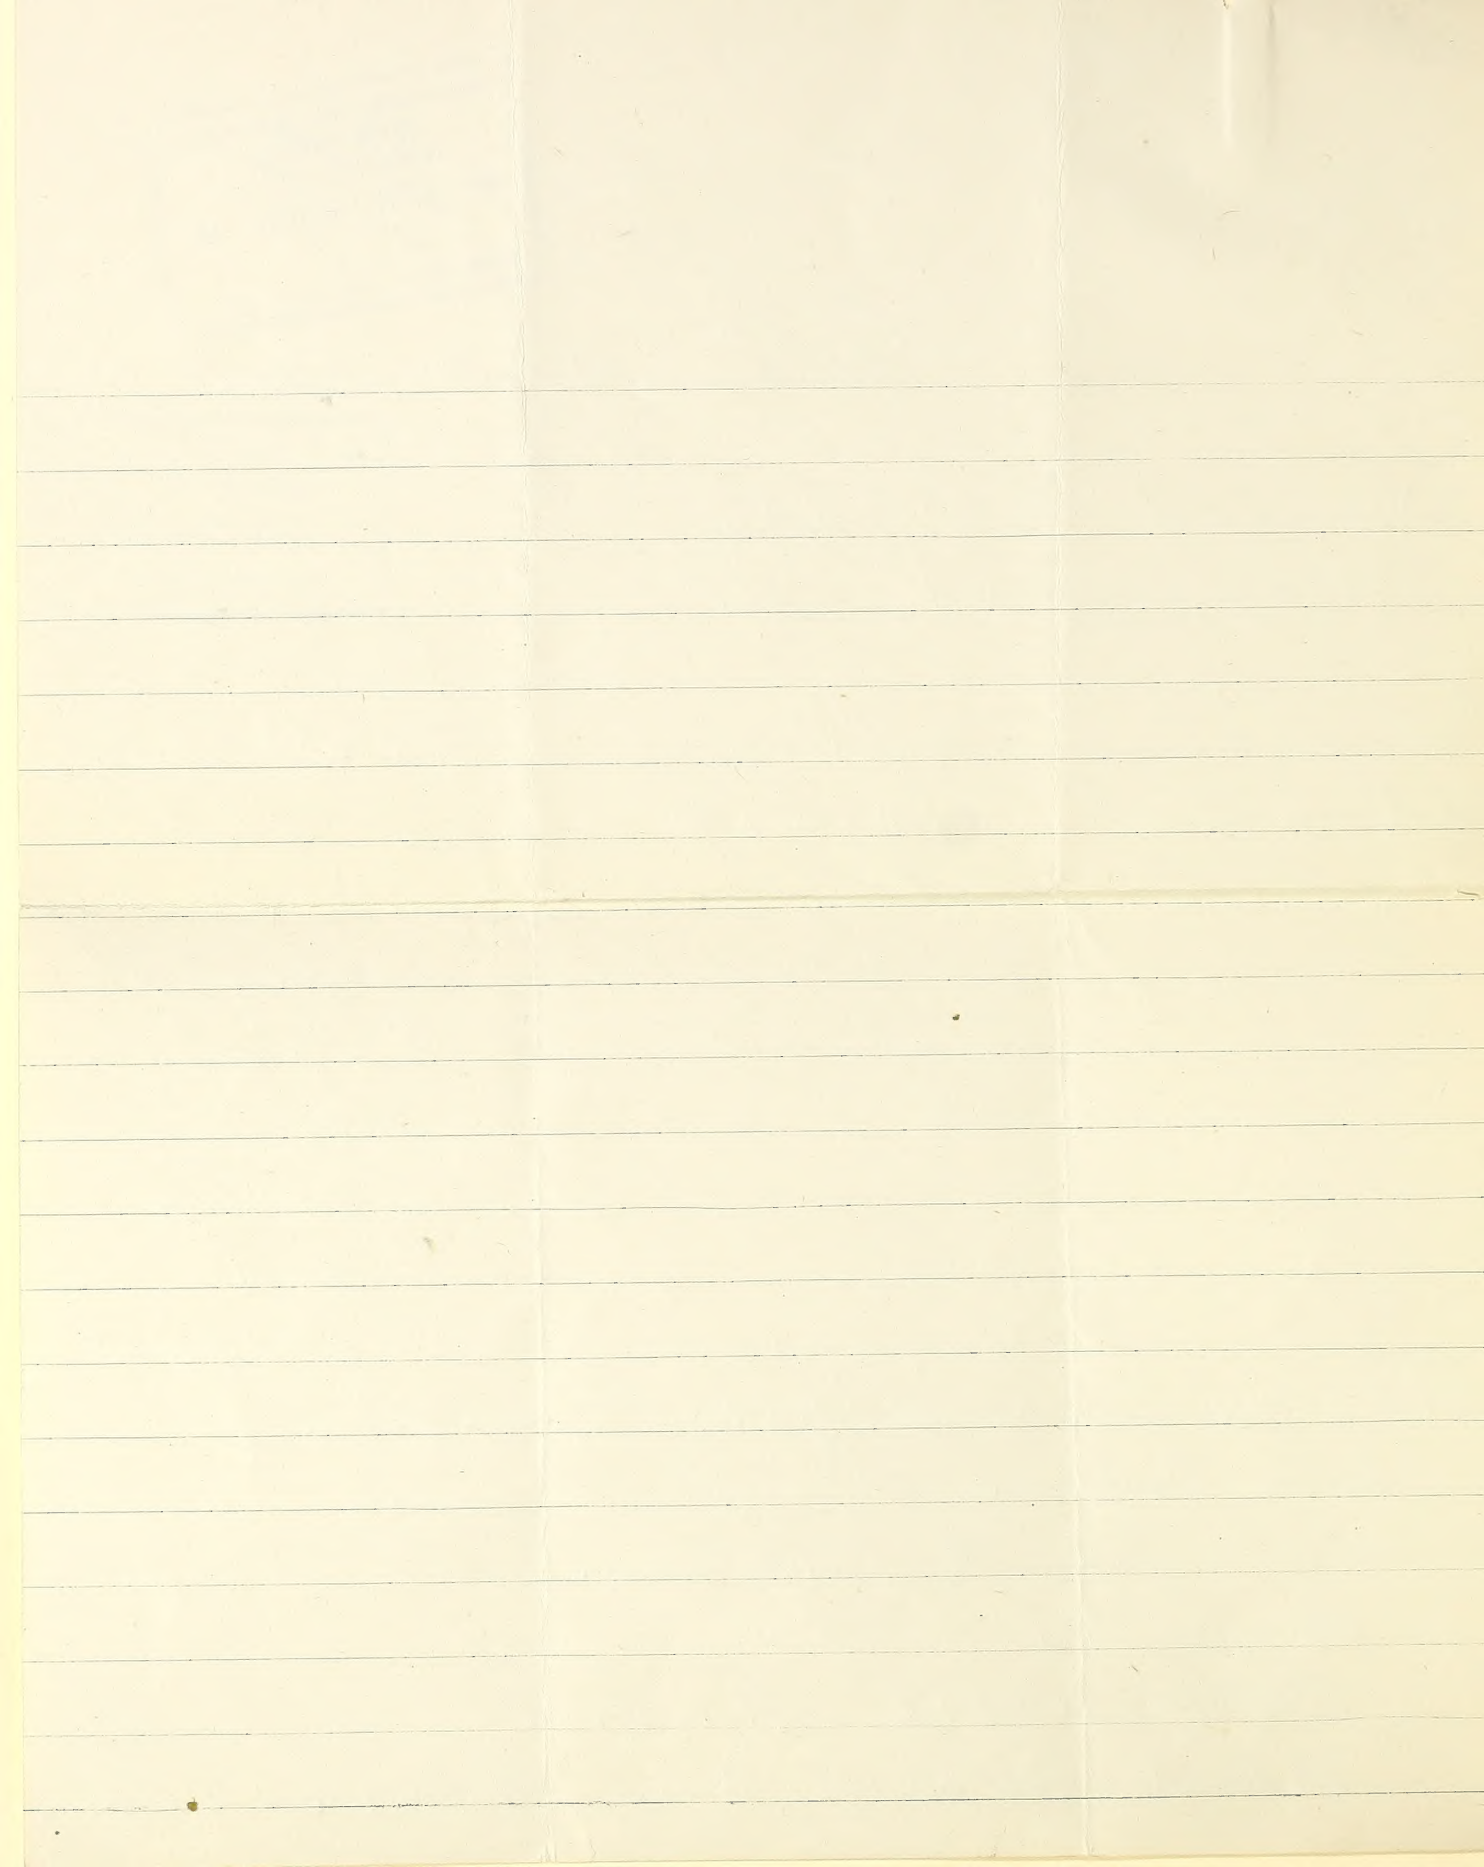

In answer to your favor of the 3rd inst.

Culture reduced to 2 acres mixed
as follows:

| | |
|----------------|----------------|
| Strawberries | Progressive |
| own berries | Succession |
| Rocket berries | St. Pique |
| Blk " | man with |
| " " | Hornet |
| " " | Cogon |
| " " | Pharmaceutical |

Hybrids undivided:

- Blk Berries + Rocket berries,
- Tree fruit crosses,
- Grape " "
- Cotton + seed crosses,
- Wheat + Indian corn crosses

2

These stacks + basins for apples,
" " " " Cherries,
" " " " Plums,
for overflow sections,
— mechanical inventions as yet —
impresented to the Syst., covers my
mergies. If I should develop anything
worth while, I will acquit you. I would
like to note that I do not think the
Free bearing Straw bins in the South
are going to prove equal in the
North + West. The mammoth Ash berry
as yet I am not so pleased with — The
California grapes entirely rather the best found
— and now Eastern also the same — as yet I
am on the fence, as to what will be final.
The entire Japan grafts and with Plum stock
from this valley overflow here, at 1/4 only,
seemingly not dwarfed.

I am very truly, J. C. Davis
